FILE TITLE **CUSTOMER REPLACEABLE UNITS (CRU)** **SN 76302**

Ultrasound Service

APPLIES TO:

All GE Ultrasound Products listed in Table 1-1.

NOTE: *This is a technical document to inform the field of FRU parts also categorized as CRU. Please refer to your region service operations teams for the implementation process. A CRU is a FRU part that can be replaced by the Customer and Customer confirms functional check at site.*

PROBLEM:

There are existing parts that have been confirmed by their respective Engineering Teams as being categorized as both FRUs (Field Replaceable Units) and CRUs (Customer Replaceable Units).

NOTE: *This is a technical document to inform the field of FRU parts also categorized as CRU. Please refer to your region service operations teams for the implementation process. A CRU is a FRU part that can be replaced by the customer and customer confirms functional check at site.*

Customer Replaceable Units were based on the following criteria:

1.) The part must be an existing external FRU
2.) No tools are needed to replace the CRU
3.) Less than 5 minutes to replace
4.) The customer can confirm with guidance from FE and/or User/Service Manual that the service event has been corrected

FILE TITLE **CUSTOMER REPLACEABLE UNITS (CRU)** **SN 76302**

SOLUTION:

The following matrix in Table 1-2 on page 3 is provided as a summary of the existing CRU parts for each system.

NOTE: *Using a FRU part as a CRU is at the discretion of the Field Engineer based on Customer relationship.*

LONG TERM SOLUTION:

At the product's next Proprietary Service Manual update Chapter 9, Renewal Parts, will be updated to include a CRU designation.

Submitted by:

Staale Smith
